

3M Potassium Acetate Solution

Cat: K8152

Specification: 500mL

Storage: Store at room temperature, and it is valid for 1 year

Introduction

Potassium acetate solution is a common molecular biology reagent. This product is mainly composed of glacial acetic acid and KOH, with an acetic acid concentration of 3M and a pH value of 5.5. It is commonly used for the small-scale preparation of plasmid DNA using alkaline lysis.

Product Information

English name: Potassium acetate solution

Concentration: 3M

CAS: 127-08-2

Molecular formula: C₂H₃KO₂

Molecular weight: 98.14

Appearance (Character): Transparent liquid

Note

1. The products are all for scientific research use only. Do not use it for medical, clinical diagnosis or treatment, food and cosmetics, etc. Do not store them in ordinary residential areas.
2. For your safety and health, please wear laboratory clothes, disposable gloves and masks to operate.
