

## Hemin Solution

**Cat:** H8132

**Specification:** 0.5mg×10 vials/box

**Storage:** Store at 2-8°C, and it is valid for 1 year.

### Introduction

This product is a microbial culture medium additive, which is a dark brown solution.

### Composition:

Chlorohemin	0.5mg
Distilled water	1ml

### Usage Instructions:

In a sterile environment, use a grinding wheel to score the neck of the ampoule bottle directly below the blue dot. Holding the ampoule away from the blue dot, break it open while wearing gloves. Wait for the culture medium to cool to 40-45°C, then perform the operation under sterile conditions. Use a pipette to add an appropriate amount of this product, gently mix it well, and set it aside for future use.

### Note

1. This product is a complementary additive specifically designed for use with our company's culture medium. Please use it in conjunction with the culture medium.
2. This product is intended for use in microbial testing only.
