

JM109 Recipient Bacteria

Cat: C1310

Size: 1mL

Storage: Store at -70°C , valid for 1 year.

Introduction:

An amber inhibited F 'recombination defect strain. This strain supports the growth of M13 phage vectors and has modified but unrestricted effects on transfected DNA. F 'in this strain carries lac ZΔM15, which enables alpha-complementation with the amino end of β-galactosidase encoded in λZAP and can be used for blue-white spot screening.

Notes:

1. If the biochemical reagents produced by our company are not specially marked, they are basically non-sterile packaging. If they are used in cell experiments, please pre-treat them in advance.
2. Once it is prepared into a solution, please pack it separately and store it to avoid product failure caused by repeated freezing and thawing.
3. The product information is for reference only, if you have any questions, please call 400-968-6088 for consultation.
4. This product is for scientific research only. Do not use for medicine, clinical diagnosis or therapy, food or cosmetics. Do not store in ordinary residential areas.
5. For your safety and health, please wear a lab coat and wear disposable gloves and a mask.
