

## pCAGGS-HA plasmid

**Cat:** C6140

**Size:** 20μg

**Storage:** -20°C, valid for at least 5 years

### Introduction:

Each batch of the company's plasmid strain has undergone strict multiple verification before delivery. Please centrifuge briefly after receiving the plasmid, take 2μL and transform it into the corresponding receptive state, select the monoclonal and re-extract the plasmid before use.

### Basic Information:

Promoter: CMV

Replicator: pUC ori

Classification of plasmids: mammalian cell carriers; Protein overexpression plasmid

Plasmid size: 4807bp

Prokaryotic resistance: ampicillin, Amp

Clone strain: DH5α

Culture condition: 37°C, aerobic, LB

Host of expression: mammalian cells

### Plasmid Profile:
